

ACSys Workshop

ACSys 2006 3rd Workshop on Agents for Complex Systems in conjunction with
SYNASC-2006
8th International Symposium on
Symbolic and Numeric Algorithms for Scientific Computing
Timisoara, Romania
September 26 - 29, 2006
Workshop Chairs:

Joel Quinqueton, LIRMM, University of Montpellier II, France
Adina Magda Florea - Department of Computer Science, "Politehnica" University of Bucharest, Romania

Workshop description Autonomous agents are software entities that are capable of independent action in open, unpredictable environments. Agents and multi-agent systems are currently applied in diverse domains that require complex problem solving models. The aim of the workshop is to bring together researchers and developers from academia and industry in order to discuss current scientific and technical results on using agents technology for solving complex, distributed real-world problems. The workshop welcomes submissions of original, high-quality papers reporting on models or systems that have been or are being implemented. Experience reports and application demonstrators are particularly welcome.

Topics:

Specific topics of this workshop include, but are not limited to, the following:

- Multi-agent systems for modeling and simulation
- Agent oriented software design and methodology
- Performance analysis / modeling of multi-agent systems
- Task-based agent context and task-oriented agents
- Multi-agent systems in high-performance processing
- Agents and multi-agent systems for Grid Computing
- Recommendation agents for scientific problem solving
- Distributed knowledge integration and sharing for scientific applications
- Agent based resource and service discovery
- Agents and emergent behavior

Submission of papers:

We invite submissions in the form of:

- full research papers,
- short papers (work in progress), system descriptions and software demonstrations.

Papers of up to 8 pages (IEEE style) must be submitted electronically to vnegru@info.uvt.ro

Extended abstracts (up to 4 pages) may be submitted for short papers and system presentations. Only full papers will be considered for publication in post-proceedings.

Papers will be refereed and accepted on the basis of their scientific merit and relevance to the Workshop topics.

Publication:

The extended abstracts of the papers accepted for presentation at SYNASC'06 will be available to the participants on a CD at the conference site.

Revised versions of papers presented at SYNASC'06 will further be published by IEEE Computer Science Press.

Workshop deadlines:

Submission of papers: Extended deadline 30 July 2006
Notification of acceptance: August 10, 2006
Final paper: September 1, 2006
Registration: September 1, 2006
Symposium starts: September 26, 2006
Revised papers for post-proceedings: October 30, 2006

Program Committee (under construction):

Costin Badica, Romania
Stefano Cerri, France
Christo Dichev, Bulgaria
Vladimir Gorodetsky, Russia
Vasile Palade, UK
Marcin Paprzycki, Poland
Nicolas Sabouret, France
Amal El Fallah Seghrouchni, France
Calin Sandru, Romania
Doina Tatar, Romania
Marie-Claude Thomas, France
Dan Tufis, Romania

Local Workshop organizer:

Viorel Negru - Department of Computer Science, West University of Timisoara, Romania, vnegru@info.uvt.ro
